

Olink® Proteomic Analysis

Expand What You Can Learn
From Your Samples

MedPharm is an Olink® Certified Service Provider, bringing highly sensitive proteomic analysis into our research and development capabilities.

Olink®

CERTIFIED
SERVICE PROVIDER

Key Capabilities

Target, Flex & Focus Panels

Certified to run all Olink Target, Flex and Focus panels.

Human & Mouse Samples

Analyze samples across a wide variety of biological matrices.

Sample Volumes as Small as 1 µL

Highly sensitive protein analysis using minimal sample volumes.

A Wide Range of Sample Matrices

Olink proteomic analysis can be performed across a variety of sample matrices, including tissue, plasma, serum and tears, as well as multi-species samples.

Have a different sample matrix?

Talk with a MedPharm scientist about compatibility.

Olink® Data Analysis

MedPharm also offers data analysis services using Olink Analyze, a custom data package designed for Olink-generated data, supporting the appropriate bridging of data across studies and sample batches.

What could deeper protein insights reveal about your samples?

Talk to a MedPharm scientist.
